NOTE:

This questionnaire has been annotated to aid data users in matching SDR datafile variables to the SDR questionnaire.

Red text boxes with a solid border next to questionnaire items contain names of SAS variables populated with responses to that question.

Variables derived from reported information (i.e., recodes) are noted in **blue text boxes** with a dashed border and are placed near the variables or questions used to create the recodes.

In addition, the SDR datafile includes variables pulled from other data sources such as the Doctorate Records File that do not appear in this annotated questionnaire. These data are documented in the codebook.
